I have been a counsellor for almost 10 years and in the Mental health field about 20 years. I have a small group practice and I have been providing supervision for the past 5 years. Im very passionate about my work, being a counsellor is my calling. Teaching is also what I find very rewarding thats why I decided to be a supervisor.

Im an eclectic counsellor and supervisor but my work is greatly influenced by Person Centered Therapy, AEDP, IFS, and Existential therapy. I am trained in level 2 AEDP and level 2 EFT for couples. I am working my way through getting certified in these 2 modalities. I love doing deep healing work and most of my clients are long-term clients. I like to use some Socratic questioning when supervising because I like to challenge people to look inside and find the answers. I believe clients help us work through so much of our own struggles and a big part of supervision is to explore what happens to you in the presence of the client. I am very kind and caring but also direct and blunt. My goal is to help practitioners to grow and improve and be a better version of themselves. I strongly believe in doing our own therapy work, continuing education, and supervision. I practice what I preach and I have 2 supervisors ( looking for a third one) and a counsellor who I see on consistent bases.

In my free time, I like to dance, meditate, read, hike, travel, spend time with friends, watch TV, and go on adventures,

If you are ready to learn, to be challenged, and to grow I love to be part of this wonderful journey with you!

### Area of Supervision:

- Clinical Supervision
- Clinical Consultation
- Group Supervision

### Type of Services

- Telephone
- Online/Remote
