Over the last 16 years, I have dedicated my time to learning about perspectives, thoughts & behaviours and my role working with people through their life challenges. I enjoy learning and will continue to devote time to gaining knowledge. I have life experience as well as working experience in the a variety areas including but not limited to family, individual, and trauma. This work has given me the opportunity to greatly expand my knowledge and experience.

I am a warm, supportive, non-judgmental person, who strives to provide a safe, comfortable and confidential environment. I believe that each person brings their own set of contributions which enables me to assist in creating a unique plan of action in moving forward. I work to promote self-awareness, growth, and strength. My intent is to build a strong supportive network in the metal heath field.
