

Mary Kwan RCC-ACS

I have practiced as a Clinical Psychologist in Hong Kong for over 20 years. I have worked in 2 government department, NGO, private sector and started my own clinic as well. I am also a trained university instructor in Canada and have taught in public and private university/colleges in Canada. I have updated myself in course work in the field of Educational Psychology. I enjoyed helping clients through individual and family counselling, and particularly through group counselling. I am familiar with issues like depression, anxiety, stress, parental issues, growth, and have particular interests in Autism and ADHD. I would love to help others to thrive in this field of helping profession.
