I've been a clinical supervisor for eight years, supporting therapists and interns in public and private clinical settings. As Clinical Manager/Supervisor for a Lower Mainland family service agency I supported counsellors working across a broad range of modalities and therapy formats including individual, couple and family therapy. My formal training includes Satir Transformational Systemic Therapy, Emotion Focused Family Therapy, Acceptance and Commitment Therapy and Cognitive Behavioural Therapy. More recently (2022/23) I was approved to supervise RCCs undertaking consent agreements with BCACC to address formal complaints. I find it rewarding to provide counsellors undergoing this difficult process with supportive, strengths-based, targeted supervision to objectively review ethics and conduct issues resulting in a renewed commitment to responsible care. I pursue my own peer and private supervision on an ongoing basis, and follow a framework that models metacompetence, promotes reflective practice, supports cultural humility, and aims to set clear expectations for the supervisor-supervisee relationship.
