I have been supervising master's degree interns since 2014. I have an Adlerian and interpersonal neuroscience approach to my work. My goal is to support you in connecting with yourself and with your clients at a deeper level. We will look at the relational dynamics (and parallel process) that is occurring between you and your clients during therapy sessions. My supervision lens is best aligned with the 7 Eyed Supervision Model by Peter Hawkins and Robin Shohet.

Area of Supervision:

- Clinical Supervision
- Clinical Consultation
- Peer Supervision
- Peer Consultation

Type of Services

- Online/Remote
- In-Person
