Having a safe space for self-reflection, and exploring self in the context of a counselling session helps us grow as individuals and clinicians. Clinical Supervision with Vickie will allow an opportunity for this growth through the examination of cases from a post-modern modality by working collaboratively with clinicians through dialogue and sharing power within the relationship as solutions are explored.

Vickie Kampe holds a Master's degree in Counselling Psychology and is a Registered Clinical Counsellor with the British Columbia Association of Clinical Counsellors RCC #4593. She encompasses formal training in several different skills-based, client-centered counselling modalities: Cognitive Behavioral Therapy, Dialectical Behavior Therapy, Emotion Focused Therapy, Mindful Based Stress Reduction and EMDR.
